The newly restyled MICRO-DIVE MK2 is a mini-sized full colour LEDs colour changer specifically designed for underwater applications that features an IP68 (Full Dry) protection rating. State of the art electronic colour mixing, low power consumption, no moving parts, long life light source, light weight and compact size are some of the bonuses that grant superior performance, extreme durability and ease of installation. Standalone colour sequence selection is an alternative to the four-channel DMX 512 standard digital control system. A choice of beam angle options is available to suit most requirements.
